

PELLET HEATING PLANT **KE00**

There can be no simpler solution than a ready-to-run pellet heating plant from Kvänum Energi! Using a flexible modular system, we optimise and build each plant to satisfy each customer's unique needs. Installation takes just one or two days and is carried out on site by our own technicians. The plant is then ready for immediate use – everything necessary is included! The **KE00** is a compact and versatile plant for moderate power requirements. It comes integrated with the pellet silo module of your choice. For additional heating, it may also be equipped with **supplementary solar panels** or **solar cells**.

- Silo and integrated KE00 module with space for one or two small pellet boilers.
- Can be supplemented with solar panels or solar cells.
- Fully welded steel construction in any colour.
- Insulated with internal plate cladding.
- All electrical installations and lighting supplied complete.
- Customer-tailored piping.
- Chimney(s), flue gas cleaning and automatic ash handling included.
- Can be combined with any of our pellet silos (some examples given below).
- Fuel level measurement via IR readings.
- Rapid installation – easy to move if the need arises.
- Crane and installation technicians an integral part of delivery.
- Construction drawing for base slab supplied.

**Ready
to run!**
